**The bananas and pears are doubles. The tomatoes are not.**

**4 + 4 = 8**
**5 + 5 = 10**
**6 + 6 = 12**

**7 + 7 = 14 would come next.**

---

**The calculation that matches the picture is 9 + 9 = 18.**

**The bananas are not doubled because 8 is not double 5.**
**The cherries are doubled because 12 is double 6.**

**There are six possible doubles from rolling a pair of dice:**
**1 + 1 = 2, 2 + 2 = 4, 3 + 3 = 6, 4 + 4 = 8, 5 + 5 = 10 and 6 + 6 = 12.**

---

| ✗ | 12 + 12 |
|---|---|
| ✓ | 6 + 6 |
| ✓ | It is double 6. |
| ✗ | Double it to make 12. |

**1 → 2**
**2 → 4**
**3 → 6**
**4 → 8**
**5 → 10**

**Children should spot that the answer increases by 2 each time. They could use this pattern to carry on finding doubles.**
